Ecological Modelling 88 (1996) 311–312

ECOLOGICAL MODELLING

# Contents of *Ecological Modelling*, Vol. 88

VOL. 88 NOS. 1–3 JULY 1996

The concept of biological time for computing the switching points of a growth model for winter wheat
U. Schröder and D. Söndgerath (Braunschweig, Germany) . . . . . 1
Evaluation of simple statistical criteria to qualify a simulation
F. Mesplé, M. Troussellier, C. Casellas (Montpellier, France) and P. Legendre (Montréal, Canada) . . . . . 9
Modelling trends in soil solution concentrations under five forest–soil combinations in the Netherlands
C. Van der Salm, W. De Vries and J. Kros (Wageningen, Netherlands) . . . . . 19
Reconstructing monthly global solar radiation from air temperature and precipitation records: a general algorithm for Canada
X. Yin (Sault Ste. Marie, Canada) . . . . . 39
Spatial dynamics of a monocyclic disease in a perennial crop
A.C. Maddison, J. Holt (Chatham, UK) and M.J. Jeger (Wageningen, Netherlands) . . . . . 45
A 3-D modelling study of the sources and sinks of atmospheric carbon monoxide
J.A. Taylor (Canberra, Australia), P.R. Zimmerman and D.J. Erickson III (Boulder, CO, USA) . . . . . 53
Analysis of life table response experiments. II. Alternative parameterizations for size- and stage-structured models
H. Caswell (Woods Hole, MA, USA) . . . . . 73
Observations and model predictions of daily areal primary production in a eutrophic brackish water culture pond
J.P. Szyper (Kaneohe, HI, USA) . . . . . 83
Modeling effect of thermic amplitude on growing Chinese shrimp, *Penaeus chinensis* (Osbeck)
S. Miao and S. Tu (Keelung, Taiwan, ROC) . . . . . 93
Biogeochemical box modelling at small scale. Application to the inorganic carbon cycle in the Bay of Calvi
A. Norro and M. Frankignoulle (Liège, Belgium) . . . . . 101
The representation of space in an object-oriented computational pelagic ecosystem
Ph. Laval (Villefranche-sur-Mer, France) . . . . . 113
Density-dependent matrix yield equation for optimal harvest of age-structured wildlife populations
A.L. Jensen (Ann Arbor, MI, USA) . . . . . 125
Polymorphism in bisexual reproductive patterns of cyclical parthenogens. A simulation approach using a rotifer growth model
E. Aparici, M.J. Carmona and M. Serra (Burjassot, Spain) . . . . . 133
Accounting for connectivity and spatial correlation in the optimal placement of wildlife habitat
J. Hof and C.H. Flather (Fort Collins, CO, USA) . . . . . 143
A new, simple, general technique to predict seasonal variability of river discharge and lake temperature for lake ecosystem models
L. Håkanson (Uppsala, Sweden) . . . . . 157
Shoot-based three-dimensional model of young Scots pine growth
V.L. Gavrikov and O.P. Sekretenko (Krasnoyarsk, Russian Federation) . . . . . 183
A size-structured simulation model for evaluating management strategies in gillnet fisheries exploiting spatially differentiated populations
J.S. Pet (Wageningen, Netherlands; Matara, Sri Lanka), M.A.M. Machiels and W.L.T. Van Densen (Wageningen, Netherlands) . . . . . 195

Sensitivity of a salmon population model to alternative formulations and initial conditions
J.M. Bartholow (Fort Collins, CO, USA) . . . . . 215
Simulating source–sink control of carbon and nutrient translocation in a modular plant
P. Kaitaniemi and T. Honkanen (Turku, Finland) . . . . . 227
Will a doubling of atmospheric carbon dioxide concentration lead to an increase or a decrease in water consumption by crops?
T.N. Carlson (University Park, PA, USA) and J.A. Bunce (Beltsville, MD, USA) . . . . . 241
Modelling response of single-species populations to microcontaminants as a function of species size with examples for waterfleas (*Daphnia magna*) and cormorants (*Phalacrocorax carbo*)
A.J. Hendriks (Lelystad, Netherlands) and E.L. Enserink (Haarlem, Netherlands) . . . . . 247
Development of a general ecosystem model for a range of scales and ecosystems
H.C. Fitz, E.B. DeBellevue, R. Costanza (Solomons, MD, USA), R. Boumans (Baton Rouge, LA, USA), T. Maxwell, L. Wainger (Solomons, MD, USA) and F.H. Sklar (West Palm Beach, FL, USA) . . . . . 263
Modelling the abundance of rare species: statistical models for counts with extra zeros
A.H. Welsh, R.B. Cunningham, C.F. Donnelly and D.B. Lindenmayer (Canberra, Australia) . . . . . 297
